

Social Policy Issues (Problemy Polityki Społecznej) - review form

Assessment criteria/Questions (please provide answers below)

1. To what extent is this manuscript (the problem tackled, the data used, the methods applied, the results obtained) original and contributing to the development of social policy theory and methodology and/or understanding of social phenomena, important for social policy?
2. Are the objectives of the text clearly formulated? Do(es) the Author(s) set his/her/their contribution in the state-of-the art in the field? Is the theoretical background/framework applied correct/plausible? Are the formulated hypotheses plausible? Are the methods used correct/relevant to the objectives of the study/hypotheses formulated? Are the results correctly interpreted? If there are any shortcomings, what are they?
3. Is the text clearly and logically structured? Is it cohesive? Does the title correspond with the content of the manuscript? Is the text easily readable? Is the abstract appropriate? Is the data presented properly? Are the figures readable and understandable? If there are any shortcomings, what are they?

4. Please choose your recommendation based on your evaluation of the manuscript (please underline the relevant answer):

- a. Accept the manuscript as it is.
- b. The manuscript needs a minor revision
- c. The manuscript needs a major revision
- d. The manuscript should be profoundly revised and resubmitted.
- e. The manuscript should be rejected

5. In case you have suggested minor, major or profound revision please provide suggestions for the author(s) on how to modify the text.

6. Confidential comments for the Editors (nonobligatory)
